Subject: RE: QAPPs for JBLM

Meseret and Tim,
I read through the Log Center QAPP and have the following comments:

1.WS # 11, Step 2: The first bullet does is not really a part of the Study, i.e.: preventing offsite migration of contaminated groundwater. The remedies have that as a partial goal. There needs to be mention that the study (QAPP) is to evaluate whether the treatment systems will eventually achieve drinking water standards (MCLs) for the COCs.

2.Figure 11-2: The symbols for sample frequency do not include a pentagon, which are depicted on the figure. I think you meant to have the circle be a pentagon.

3.WS#14, Section 14.8: Need to update the sample frequency table. Currently it indicates SLA P & T air emission evaluation as occurring in July 2018.

I will focus on the Programmatic QAPP now.

Chris,

No problem, take time to review the document.

A data summary report will be provided later as part of the PA/SI report. May be a section in the PA/SI report. Is this what you are asking or separate standalone data summary report addressing the CERCLA protectiveness summary?

Meseret,

Yes, I have the documents and am reviewing them. I could use a few days to get through them if that is acceptable.

Also, Will you be providing a data summary report of the PFAS sampling, besides that one page table?

Chris,

Please see the attached e-mail correspondence between you and JBLM Contractor Tim McCormack. If you still you don't have the documents I will send to you soon.

Meseret,

I don't have the draft plans you mentioned earlier today. I searched my work area and the electronic file system we have, no "recent" JBLM documents are in there. I don't recall seeing them, so I speculate they either sent them to a wrong address, someone here messed up, or they were not sent out to me. I'll prioritize reviewing them if you resend them.
